

R605 PERGOKLIMA

NEW
2017

Pergola bioclimatica autoportante in alluminio dal design ricercato e innovativo. Gronda perimetrale da 20 x 20 cm. con raccolta acqua integrata nei montanti di forma triangolare. Copertura a lamelle in alluminio da L 22cm x H 4cm orientabili da 0° a 140°, complete di garnizioni e gronda scarico acqua laterale. In base all'orientamento delle lamelle, la struttura, offre protezione totale o parziale dal sole, una perfetta climatizzazione, e un sicuro riparo dalla pioggia divenendo uno spazio da vivere sempre. Dimensioni massime realizzabili in modulo unico L 4.50 x S 5.00 mt. con quattro montanti perimetrali triangolari da 20 x 20 cm. Funzionamento esclusivo a motore lineare a bassa tensione. La struttura, offre optional aggiuntivi, come luci LED o teli a drappeggio, in grado di creare sinergie tra il nuovo ambiente e quello circostante, che generano nuove soluzioni ogni volta originali e personalizzate. I profili portanti consentono l'applicazione di frangisole e vetrati.

Bioclimatic self-supporting pergola with a refined and innovative design. Perimetrical water drain cm. 20x20 for the outflow of rain water in vertical triangle poles. Roof made of aluminium blades L cm. 22 x 4 that can be orientated from 0° to 140°, complete with gaskets and lateral drain of water. The structure can offer a complete or a partial protection from sun, a perfect air-conditioning and an assured shelter from rain, becoming a real living space.

Maximal dimensions of single form: L mt 4.50 x projection mt. 5.00 with 4 triangle poles of cm. 20x20 only.

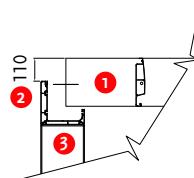

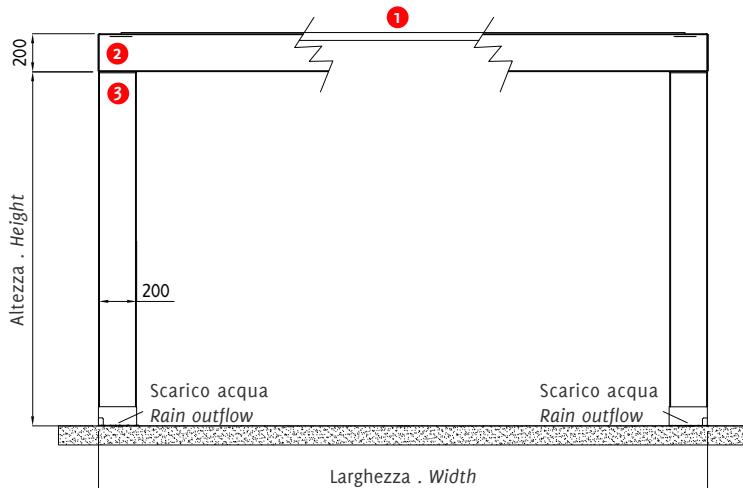

Working by linear motor low-tension. Availability of options as LED lights or curled curtains, generating synergies between the new and the existing environments, offering each time personalized and original solutions. Bearing poles consent the application of sun-breakers or glass doors.

** Sensore per chiusura automatica delle lame in caso di pioggia . Sensor for automatic closing of blades in case of rain.

*** Sensore per comandare l'apertura delle lame alle temperature prossime allo zero termico (in caso di gelo o neve per evitare accumulo sulle lame) . Sensor to control the opening of the blades at temperature next to zero (in case of freeze or snow accumulation on the blades).

La struttura è stata studiata e progettata per la protezione da sole, pioggia e vento. In caso di nevicate si raccomanda di posizionare le lame in verticale per evitarne l'accumulo. La movimentazione con neve o carichi sovrastanti, potrebbe arrecare danni alle parti meccaniche . This structure has been projected and realized for sun, rain and wind protection. In case of snowfalls we recommend to put blades in vertical position to avoid accumulation. Handling with snow or loads above could cause damage to the mechanical parts.
